

## RITRAMA WRAPPING SYSTEM

Ritrama Wrapping System supply **turnkey solutions** for visual communication professionals that want to enlarge their business with car wrapping and decoration.

A useful and popular Application Guide carrying comprehensive but simple information about the application of self adhesives, has been supplemented by Ritrama with an **exclusive Video** which explains, describing **stages from A to Z**, how to apply sign-making materials and digitally printed vinyls on cars, vans and riveted trucks, but also windows and big glass surfaces

**VISCOM DIVISION**

### RI-JET CAST 50 WHITE AIR FLOW REPOSITIONABLE ADHESIVE

This exclusive construction combines:

\_ **SPEEDY** and trouble film application thanks to the Airflow pattern in the adhesive which allows air to be easily squeezed out during the application of the material.

\_ **EASY** repositioning of the material during application thanks to the specialised ASP33 adhesive which has a very low initial tack, but after a short period of time builds to a permanent, giving a secure and weatherproof finish.

### MATT BLACK CAST 50 CARBON WRAP WHITE & RED PEARLESCENT CAST 50

High performance flexible CAST vinyl designed for full and partial vehicle wraps including application to **irregular surfaces**. Ritrama's new Cast materials include eye-catching Pearlescent finish white and coolers together with 50µ Matt Black and 110µ **Carbon Wrap** both supplied with ASP33 repositionable adhesive and Airflow liner for speedy and trouble free application.

### RI-JET 30 FLEXILAM

Ultra thin and highly conformable cast overlaminating films available in **GLOSS** and **MATT CLEAR** designed to be used together with Ritrama's Ri-Jet 50 Cast white materials providing a finished laminated graphic still thin and conformable for full vehicle wraps. The Matt Clear film can also be used to laminate solid colours changing the final appearance to Matt which is currently a popular choice for vehicle graphics and wraps. Both films feature a solvent based permanent adhesive and provide additional protection from the elements.

### STONE GUARD 240 & 320

Durable clear soft vinyl film available in 240µ and 320µ versions, specially designed for various **automotive surfaces** providing protection against paintwork chips and abrasion caused by stones etc.
